***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a wallboard, classified in class 428, subclass 304.4
- II. Claims 10-24, drawn to a method of making a wallboard, classified in class 156, subclass various.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) ~~that the product as claimed can be made by another and materially different process~~

(MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product such as the composition having a viscosity less than 600,000 centipoise.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to David F. Zinger on 12/18/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
